

# Vitamin D – Experts' Forum 7 April 2011

---

- Extraordinary level of observed correlation between serum 25-hydroxy-vitamin D and many serious pathologies.
- Vitamin D causative in many of these outcomes?
- ‘Conception to Grave’ maintenance of a physiological vitamin D status = biggest improvements in public health since the arrival of antibiotics?
- Previous disappointments and safety > critical approach

# Vitamin D – Experts' Forum 7 April 2011

---

- Minimise delays in decisions which result in prevention of serious illness
- Vitamin D Association – non-profit, no support from commercially interested organisations.
- First step – a series of clinical update and discussion conferences.
